

**Idea**

Business for care packages- natural disasters

Website for donations/create own packages, blog on people's good feelings

Card in package, where its coming from, business doing it, taste of the state component (green chile for example), logo, mission statement (brought to you by 7th grade)

How much to make one package, variety of packages based on type of disaster

Need to think about shipping (Puerto Rico for example)

Analyze data about how often disasters happen in different areas/types of disasters

**Three Reasons:**

1. Helping people inside our community, nationally, and regionally
2. It could be cool being a founder of a company one day. Although this is not our main goal right now, we will be learning about the process.
3. Prepares us for the world outside of school. We are the leaders of tomorrow and our goal for the 8th grade is to answer the question: am I ready for the challenges beyond middle school, including being an engaged global participant?
