School Name: South Valley Academy Mid

Area of Science: Put Area of Science Here

Project Title: Factors that contribute to teen pregnancies

What the problem is (the definition of the problem)?

The problem is why do teen age girls get pregnant at a young age.

Why it is important or what results you hope to get (the purpose of the project)?

It is important because it is bad to have a kid at a young age. Also young girls are getting kicked out of their parent's houses.

How you plan to work on it (plan of action or methods)?

Collecting data and finding out what information may stop this trend.
