“What power urges them at such terrible speeds through the sky? Who, what, is aboard? Where do they come from? Why are they here? What are the intentions of the beings who control them?

Before these awesome questions, science and mankind can yet only halt in wonder. Answers may come in a generation or tomorrow. Somewhere in the dark skies there may be those who know.”

Life Magazine
April 7, 1952

Executive Summary

Not many people believe that extraterrestrial life does not exist. Although most people think of it as a make-believe substance, that was made up by the imagination of a person. However, people all have a different belief, as you know, in life, and we as a team believe that there are other life forms, with greater technology than ours, that exists in the universe.

As a team, we have discovered and collected a numerous amount of data, using an approach of research by looking at different aspects of fields pertaining to extraterrestrial life and their technology. We have discovered many interesting and fascinating events. Our main focused was studying the public’s information of stories of sightings of UFOs and close encounters with extraterrestrial life such as visitations and abductions. There were other interesting events and topics we studied such as such as crop circles, unknown radio waves, mysterious lights in the night skies, and the accident in 1957 in Roswell, New Mexico.

We have discovered people that believe and have the thought of the existence of extraterrestrial life are within a small amount of this world.

Introduction

The universe is full of surprises, yet we do not know what kind of surprises. We know for a fact that there is life that exists in outer space, the galaxy, the universe, or whatever the people call it. There is logical information that there has been life that existed on the planet Mars. However, the likelihood of this “thing” made scientist think about many things scientifically, and it has been pointed out that it is not humanity. The life of a human cannot live in any other planet but the earth. At least, that is what we believe. So we are going to introduce you to a whole new perspective of seeking the existence of life in the outer world. The questions that are commonly asked are “Can humans survive in the galaxy?”, “Is there a way that we can make it possible for humans to go out and survive in the universe?” and “Are we not the only life existence and is it aliens that have made these appearances on other planets?” With these questions in mind, we will search for information on whether or not there is a possibility that life can exist in or on any planet in the universe.

Hypothesis

Extraterrestrial life forms, such as UFOs and their technology, have been seen in different areas of Earth and by a numerous amount of different races of people. The information of stories from history to the public’s thoughts and have come to a question of close encounters of extraterrestrial life seeing if there is a possibility of the existence of another life form within different parts of space.

Model

Our model is giving 100 surveys out to many varied Shiprock High School students to males and females. This survey asking if they do believe that there is another life form in the galaxy, if they do not believe that there is no life in the galaxy, or if they were not sure whether there is no life or life in the galaxy.

Project Description

Method

As a group of interested students within the field of extraterrestrial life, also known as aliens and UFOs, we are going to research and look at different points of views within extraterrestrial life from these following categories of fields.

- Biblically
- Scientifically
- Public thoughts, opinions, and reactions.
- Government's reaction and explanations of events (Roswell, N.M. incident and other mysterious events.)

Implementation

The information of the public's stories of sightings, the close encounters, and the history of extraterrestrial life from this information we had a thought of also surveying a hundred students at Shiprock High School.

As you know we looked at all different points of views and different fields of obtaining our information of extraterrestrial life.

The history of extraterrestrial life begins from

- The Bible of the chapter of Ezekiel's book.

The vision of a mission of God from the messengers of four strange creatures.

Through history there have been recorded sightings of UFOs in many places of this world within our past history.

- In 329 B.C.

Alexander the Great's army was attacked by the sky which is thought to believe was two UFOs.

- The God of Rah

Though to have been a UFO shaped as an eye

- Many Ancient Ruins of carvings of drawing of UFOs and aliens.

Many close encounters and sightings have taken place within our modern days of our generation and past history.

- In the Vietnam war

Reports of strange lights in the far distant in the sky and some reports of missing aircraft.

- The Roswell, New Mexico incident in 1957

The first UFO obtained substance and close encounter of extraterrestrial life and its technology.

- Area 51

The story of a scientist that told the public of what was taking place within this area. The affect of his statement was he was criticized.

- A true story of an abduction by extraterrestrial life told by the man of Whitney Strieber.

The events in which took place and the meaning.

Extraterrestrial life history has been found within different parts of our world of history and events and to our group we find that very fascinating for the reason of extraterrestrial life being around over a long period of time.

Results

From the information that we obtained and studied it has convinced us more on the existence of extraterrestrial life. We have also learned of many other interesting and fascinating information of extraterrestrial life and their technology and that there are people within our area that believe in extraterrestrials.

As results shows:

- 35 males and 28 females said that they do believe that there is life in the galaxy.
- 7 males and 6 females said that they do not believe that there is no life in the galaxy.
- 10 males and 14 females said they are not sure whether or not there is no life in the galaxy.

As we did our project, our results came out to be great as we gave 100 surveys out to many varied Shiprock High School students to males and females. This survey asked if they do believe that there is another life form in the galaxy, if they do not believe that there is no life in the galaxy, or if they were not sure whether there is no life or life in the galaxy.

Conclusion

We as a team we have come to a conclusion that we strongly believe that there is life in the galaxy. We accept the answer to our question to be true because of many theories and stories that have been seen and told appear extremely true. So many people in the world, the past and the present, have their own judgment on how there is life or no life in the galaxy. We all know this is true but in some cases, there is a lot of criticisms about what people say and do.

However, many people around the world have their negative sides and do not believe that there is not any life forms that exist in the Galaxy. But, although from the information and study that we have obtained through this project we will share with other people the information about extraterrestrial life. This giving them the reason why people believe in and the existence of extraterrestrial life. We hoped that they will also believe or have some thought of the possibility of extraterrestrial life

Recommendations

Our project required us to narrow this down to expand in our fields of interest, and by doing this we will be getting some information from the public and students from the community of Shiprock. We will study more of extraterrestrial life within our world collecting and reading more of stories from the public pertaining to extraterrestrial life. From this situation we hope to obtain more information of extraterrestrial life and their technology, to see if some of our information of stories are all related and add up together, and to convince others of the possibility of extraterrestrial life.

Acknowledgements:

We would like to thank those who really encouraged us, on helped us to our Super Computing Project and got it done on time. We really did not know how our project would come out to be, but we have accomplished it and we are proud of it.

We really want to thank Mr. James Taylor for coming down from Santa Fe just to help is on our project. Not only did he help us, he gave us information on how to do our model for this project. Also, he taught us how to use the Star Logo Program for those who wanted to use that for their own project.

The next person we would like to thank is Roger Florey who mainly answered our questions related to our project. Roger studies many extraterrestrial things such as mysterious lights, UFO's, abductions, and many strange Phenomena.

We would also like to thank Eric Ovaska for taking time to show us the Java Program and helping us in some events of our project.

Appendix A – Code

```
import UserInput;

public class Extraterrestrial
{
    public static void main (String args[])
    {
        int Extraterrestrial;
        int Males and Females;

        Extraterrestrial = UserInput.getInt("Is
there Extraterrestrial life that exists?");
        Male and Female = UserInput.get("How many
males and females believe in Extraterrestrial life?");
        ("How many males and females believe in
extraterrestrial life?");
        System.out.println(YES- Males 35 females
28);
        ("How many males and females do not believe
in extraterrestrial life?");
        System.out.println(NO- Males 7 females 6);
        ("How many males and females are not sure
whether or not to believe in extraterrestrial life ?");
        System.out.println(NOT SURE- Males 10
females 14);
        ("How many males or females believe in
extraterrestrial life?");
        System.exit(0);
    }
}
```

Appendix B – SHS Thought of “Life in Galaxy”

The graph shows that:

- 35 males and 28 females said that they do believe that there is life in the galaxy.
- 7 males and 6 females said that they do not believe that there is no life in the galaxy.
- 10 males and 14 females said they are not sure whether or not there is no life in the galaxy.

Appendix C – Alien Photos

**Alien Found in China.
(Left side)**

**Same Alien from China.
(Laying down)**

Alien wreckage in Roswell.

Alien Autopsy after Rosewell incident.
