***Some questions to think about...***

What is your agents' breed? Size? Color?  
What are the agent variables?  
Describe any simple rules that the agents follow independent of other agents or the environment?

***Some questions to think about...***

Where are the agents located in Spaceland?  
How do the agents move?  
Describe the agent/agent interactions?  
Describe the agent/environment interactions?  
Describe any simple rules the agents follow?

***Some questions to think about...***

What do you want to learn from your model?  
What variables are you examining?  
What data will you need from your model?
