

Summer Teacher Institute Adventures in Supercomputing Challenge

Who? Mid and High School Teachers
What? Two-Week Face-to-Face Workshop
When? July 10 – 22, 2005
Where? Alamogordo
Why? Prepare teachers to support their student teams to implement successful Adventures in Supercomputing Challenge projects in the 2005-2006 school year.

What else? Curriculum includes problem definition, technical writing, modeling computational science problems, teamwork, and use of WebCT.

Anything else? Stipends, room and board, graduate credit and visits to local science sites (Sunspot Observatory, for example).
