

### Define the problem:

Preventing children about child trafficking is a tough topic to talk about with them and at the same time it is a bit difficult, which is why I am creating a website to be able to help parents and relatives so that they do not go up that and I can talk to them. I Plan to solve the problem computational I would like to inform you about the problem of child trafficking because I would not like people to go through that because it is very ugly. And I think the solution to this is to be careful and know the signs that a person is going through this and you can help. We will also talk about how to help parents so that they can talk to their children about child trafficking and it will not be so difficult for them since it is a somewhat delicate topic to talk to them since they are young.

### Progress so far:

So far I have learned a few things about HTML, how to create one and how to place a link on my website. Also making headers, how to have a link without it taking you away from your website. Also what I have been reading about child trafficking. I learned that sometimes traffic only comes from people who force you into a car and take you to work, but it also comes from your house because sometimes you force children to do things they don't want to do and that's part of the traffic.

### Expected results:

I hope it can help you talk more about it and that you can help people who are going through it. Also that I can help them a little to prevent it before they suffer from it. Research with citations: Talk to your child about the realities of sexual abuse. Remind your child that he can talk to you about anything. Ask him or her to come to you if there is abuse or mistreatment, whether verbal, physical, or sexual. Talk to your child about consent at a young age. This can be as simple as teaching your child that it's okay to say "no" to a hug from an adult if he feels uncomfortable, etc. On the other hand, how many child traffickers there in New Mexico said that 21,000 a year is very ugly, there 85% of people force children to do things. Another thing is that if you are going to talk to children about this you have to create a way so that they do not have a hard time understanding and are afraid at the same time, it is to explain it to them with drawings that they like. 21,000 a year, and those are the official figures that the government provides us."

### THE PROJECT

Since 2011, Shared Hope has laid the foundation for transformative policies, practices, and cultural changes by supporting state legislators and stakeholders to enact the minimum fabric of laws necessary to address child sex trafficking. Human trafficking is a global problem that takes many forms, including sexual and labor exploitation. Victims of trafficking can be any age, although most trafficking begins when victims are teenagers. Many victims of trafficking have contact with health care providers in various health care settings, both for emergency and routine care.
